Introduction

The goal of the introduction is to let the reader know the topic of the paper and what points will be made about the topic.

Features

Features define the internal structure of a dataset.

Analysis Questions

Analysis questions are inquiries that enable you to have a better understanding of a situation, task, or object.

“One of the most widespread, persistent, and devastating human rights violations in our world today. It remains largely unreported due to the impunity, silence, stigma, and shame surrounding it.” UN (VAWG)

INTRODUCTION

Violence against women and girls is a global pandemic which affects 1 in 3 women in their lifetime. This issue causes a significant cost for the future if developing countries failed to address it.

According to this, studies and research have shown that children who witnessed violence are more likely to become perpetrators of violence in the future.

As a result, reducing violence against women and girls requires sustained engagement between the community and multiple stakeholders and a multi-approach such as increasing social norms regarding gender roles.

FEATURES

This Dataset includes a survey taken from men and women in Developing countries such as Africa, Asia and South America. The survey explores the attitudes and perceived justifications given for committing acts of violence.

Numbers of columns: 8

Record ID: Numeric value unique to each question by country.

Country: Country in which the survey was conducted.

Gender: Male/Female.

Demographic Question: Refers to the different types of demographic groupings used to segment respondents' marital status, education level, employment status, residence type, or age.

Demographic Response: Refers to the demographic segment into which the respondent falls.

Survey year: The year in which the Demographic and Health Survey (DHS) took place.

Value: % of people surveyed in the relevant group who agree with the question.

Question | Respondents were asked if they agreed with the following statements:

- A husband is justified in hitting or beating his wife if she burns the food
- A husband is justified in hitting or beating his wife if she argues with him
- A husband is justified in hitting or beating his wife if she goes out without telling him
- A husband is justified in hitting or beating his wife if she neglects the children
- A husband is justified in hitting or beating his wife for at least one specific reason

ANALYSIS QUESTIONS:

- a. Is Education Level affect in increasing violence towards women and girls?
- b. Is Marital status make an effect on increasing violence against women and girls?
- c. What is the highest Employment rate?
- d. What is the maximum Age group?
